EDUCATIONAL HOUR

INNOVATIONS FROM THE FAR EAST - NEW TECHNOLOGIES FROM KOREA FOR 2018 AND BEYOND

Tim McCraw

President and Founder of Skin Science Advisors, LLC

Today, breakthroughs in cosmetic and OTC skin care products are largely driven by innovation — innovation in ingredients, innovation in product form or format, and innovation delivery systems. In Asia, Korea has been the center of several past innovations that have become commonplace in the market.

...continued on page 3

DINNER HOUR

UV FILTERS - PART OF OUR DAILY ROUTINE

Zsolt Szabados

Director of R&D at Presperse Corporation, a Sumitomo Group Company

Since 2011, after the new FDA mandated labelling rule, formulators face challenges in creating broad spectrum esthetically pleasing formulations. The limitations in the number of UV filters in the US and the numerous stability and health related concerns, do not allow for a lot of creativity, high UV performance and global compliance in formulation design. Sunscreen formulation is extremely complex - besides the prohibition of various UV filter combinations, one faces compatibility issues with several cosmetically approved ingredients.

...continued on page 3

MEETING OVERVIEW

Date: Tuesday - Sept 25, 2018

Location: Avenue of the Arts, Costa Mesa

Menu: Beef Short Ribs, Roasted Chicken
and Fall Vegetable Fettucini Alfredo

RESERVE NOW ►

Reservation Deadline: 5:00 pm Friday - Sept 21, 2018

Call-in registrations must be guaranteed with credit card and will be charged for no-show.

THANKS TO OUR MEETING SPONSOR

BARNET

Barnet Products Corp. was founded in 1987 and supplies naturally-derived, specialty ingredients and selected commodity products to cosmetic and personal care companies with a commitment to finding, developing, and presenting new concepts, ingredients and systems to our customers.

The company's main focus is on conceptual active ingredients tested in vivo and in vitro. These ingredients are presented in the context of Fashion Concepts designed to highlight both the efficacy and the marketing of the ingredient.

Barnet also offers a line of innovative System Formers from Japan. These products demonstrate unique properties that focus on Asian textures and trends. As with all of our materials, the System Formers provide new marketing opportunities with many having properties supported by in vivo testing. In fact, many of these System formers or Architectures have multi-functional properties and testing to impart unique feel, delivery of actives, suspension of select materials, anti melanogenesis and other benefits.

In addition to actives, system formers and other unique materials, Barnet has world-class support from their NJ headquarters for prototype formulas, samples, regulatory and direct Lab assistance along with experienced and customer-focused service and representation. Please visit our website at www.barnetproducts.com for more info or contact your local representatives for more information.

EDUCATIONAL HOUR ...continued from page 1

The most recent examples include the modern BB Creams that are now sold throughout the world as well as cushion compacts, now the rage in color foundations. Skin Science Advisors have identified several new innovations from Asia, more specifically, Korea, that we believe are poised to become trend-makers. There will also be novel and unique samples from Korea to touch and feel. These innovations will be presented, followed by a question and answer session.

ABOUT THE SPEAKER

Tim is the President and Founder of Skin Science Advisors, LLC. Skin Science is a consulting company focused on helping health and beauty businesses in the US and South Korea connect to improve their respective businesses. This includes concept development, product development, as well as technology exchange and manufacturing.

From 1995, Tim was a serial entrepreneurial executive at Kimberly-Clark corporation. Tim was responsible for starting new businesses from within the larger corporation. During the ten year period starting in 2000, Tim worked and lived in South Korea as a part of this assignment. Prior to joining Kimberly-Clark, Tim held several key executive roles in CIBA-Geigy's new business, CIBA Vision Corporation, and was instrumental in growing the business. Tim was born in Spartanburg, South Carolina. He earned a bachelor's degree in chemistry from Wofford College and a Doctorate in Chemistry from the Georgia Institute of Technology (Georgia Tech). Tim and his wife Joan live in Peachtree Corners, GA and have two children.

DINNER HOUR ...continued from page 1

For example, the choice of a solvent/emollient could positively or negatively impact the absorption of the filter system or cause instabilities, such as crystallization.

Emulsifiers are another category of ingredients, that needs close attention, since they could impact the water resistance of the formulation; also bring in possible irritation in already UV sensitized skin. Polymers can influence the rheological profile of the product providing the potential for interesting textures, while impacting the uniformity and the thickness of the film delivered on the skin surface, and thus the UV performance. Boosters also, can enhance the cosmetic appeal and the sunscreen performance of formulations, such as reduction of whitening and tackiness.

Nevertheless, as consumers are more and more aware of the harmful effect of UV exposure, formulators are pushed to include UV filters in all type of preparations, as sunscreens are becoming part of our daily care routines.

ABOUT THE SPEAKER

Zsolt Szabados is the Director of R&D at Presperse Corporation, a Sumitomo Group Company. He has extensive experience in Product & Application Development and Technical Service with a strong focus on Personal Care and Cosmetic Science.

Prior of his tenure with Presperse, he was the North American Technical Specialist for Sun Care in BASF Corp., taking part in the development and launch of several UV filters globally and formulation development for prestigious global brands. Zsolt has received an MBA in Marketing and International Management from Northeastern University, an MS in Pharmaceutics, with a concentration in Topical Dermatological and Cosmetic Applications from Long Island University and a BS in Chemistry & Physics from Babes-Bolyai University, Romania.

EMPLOYMENT OPPORTUNITIES

Cali SCC is committed to offering an effective platform for members to post open job positions directly on our website to assist with finding qualified employees to fill these positions. To view job listings or to add a position to our website, please visit our employment page at www.caliscc.org/employment or contact Ledian Dergrigorian directly at LDergrigorian@cosmeticgroupusa.com.

ATTENTION! ATTENTION!

In-House CEP Courses Available

In-House Courses are highly-personalized courses brought to companies to address challenges or areas of need. These courses, taught by knowledge experts, provide professionals with an up-to-date cosmetic science education. Recent In-House Courses have been organized for **Benefit Cosmetics, Mary Kay, Bayer**, the **FDA** and others.

Companies interested in providing in-depth technical information to their employees can contract an education day in a location of their choosing.

- ▶ **SOCIETY** covers the costs of booking the instructor and all of the instructor's traveling expenses (including hotel, flight, car, etc.)
- ▶ **COURSES** can be scheduled for 1 or 2 days on any topic of particular interest to the company
- ▶ **COMPANIES** can choose the instructor if they seek a specific knowledge expert

Current courses available include:

Scale Up & Processing	Botanicals & Naturals for The Naturals Market	Preservatives
Regulatory	Chemistry & Regulations of Cosmetic Colorants	Cosmetic Rheology
Color	Molecular Biology & Gene Expression	Color & Make-Up
GMPS For Cosmetics	Phytochemistry 101 For Cosmetic Chemists	Surfactants
Cosmetic Formulations	cGMPS For Cosmetics and Otc's	Cosmetic Raw Materials
Regulatory Update	Practical Basic & Theory in Emulsion Technology	Fragrance as A Science
Beginning Cosmetic Chemistry	Cosmetic Chemists Guide to Product Development	Silicone Chemistry
Basic Hair Science	Sustainable Cosmetic Product Development	<i>and more!</i>

To reserve a course for your team,

North American Representative for Scientific Research and Testing Instruments

AquaFlux Condenser Chamber TEWL system evaluates in vivo integrity of skin barrier function and assesses in vitro and ex vivo characteristics of skin and membranes. May be integrated with Franz cells using custom designed adapters.

Epsilon A novel contact imaging system using a specially calibrated fingerprint sensor to measure and map near surface permittivity and water volume of any soft tissue, in vivo and in vitro.

TIVI700 Spectroscopy System measures microvascular effects of systemic and topically administered vasoactive materials. It is particularly useful for evaluating skin damage, wound healing, and performance of topicals and sunscreens.

TIVI8000 An economical USB powered camera probe version of the TIVI700.

DUB SkinScanner High frequency Dermatologic Ultrasound for precise measurement of skin thickness and density. It is particularly useful for delivering high resolution images of nevae and subsurface dermal structures.

C-Cube A newly introduced stereophotometry system for capturing 3D high resolution images of the skin with detailed color calibrated texture. Assesses skin and hair color, wrinkles, pores, pigmentation, lesions, and other microstructural components with unrivaled detail and accuracy. Hand held probe, USB powered. Includes in vitro accessories.

Neurometer CPT/C A neurosensory threshold testing system for objective assessment of skin sensitivity, skin irritation, and itch propensity. Ideal for documenting subtle changes for claims support.

With strong roots,
we're green
and growing.

At Acme-Hardesty, we nourish our relationships to serve our customers with an ever-branching network of connections around the globe. Since our beginnings 75 years ago as a division of Jacob Stern & Sons, those relationships have focused on sustainable, bio-based products. We embrace this approach because we believe what we do makes a difference – to each other, to our customers, and to the future of our planet.

CLARIANT

Breaking Conventions **IGNITING EMOTIONS**

ESSENCE by Clariant

ESSENCE IS:

- the intrinsic nature or core quality that determines character
- the absence of controversial ingredients
- breaking formulation and market conventions
- exciting experiences that consumers crave

5 HERO PRODUCTS:

- Amazonian Exfoliating Cleansing Powder
- Avocado Ageless Bounce Cream
- Simple Splendor Body Cleansing Cream
- Energizing Men's Tonic for Hair & Scalp
- Every Which Way Refreshing Men's Powder Cleanser

All Essence formulations are made without using parabens, formaldehyde donors, MIT/CMIT, sulfates, betaines, silicones, petrolatum, or mineral oil.

**To experience all Essence formulations, contact Regional Account Manager
Brittney Strickland at brittney.strickland@clariant.com.**

NATURE AT ITS *ULTRA* FINEST

The 100% natural, safe, cost effective solution for your color cosmetics and skincare needs.

If you are seeking a natural ingredient to replace synthetic materials in your formulation without sacrificing performance, you have found it with Micro Powders' Naturesoft 800 (INCI: Cellulose). Due to its superior binding properties it will allow any pressed powder formulation to use proportionally less oil binder, leading to longer wear and more matting effect.

Naturesoft 800 Benefits:

- ☼ Natural, biodegradable white powder
- ☼ Imparts a soft feel to pressed and loose powder formulations
- ☼ Superior binding properties vs. zinc stearate and Nylon-12
- ☼ Provides faster dry time
- ☼ Reduces wet/tacky feel
- ☼ More formulation flexibility

INFORMATION FOR AUTHORS

The JOURNAL OF COSMETIC SCIENCE publishes papers concerned with cosmetics or the sciences underlying cosmetics, as well as other papers of interest to SCC members. In particular, the journal welcomes papers concerned with cosmetics, cosmetic products, fragrances, their formulation and their effects in skin care or in overall consumer well-being, as well as papers relating to the sciences underlying cosmetics, such as human skin physiology, color physics, physical chemistry of colloids and emulsions, or psychological effects of olfaction in humans. Papers of interest to the cosmetic industry and to the understanding of the cosmetic markets are also welcome for publication. The Editorial Advisory Board is responsible for establishing policy and maintaining the Journal's high standards. The Editor relies on the advice of reviewers who are experts in the field in deciding whether a submission has sufficient scientific merit to warrant publication.

All papers presented before a meeting or seminar of the SOCIETY OF COSMETIC CHEMISTS, or those papers submitted directly to the Editor will be considered for publication in the Journal. Papers presented before the SOCIETY OF COSMETIC CHEMISTS are the property of the SOCIETY and may not be published in or submitted to other journals. Only if the JOURNAL OF COSMETIC SCIENCE is unable to publish a presented paper, may it be published in another journal of the author's choice.

Results concerning animal (not human) physiology are outside of the scope of the Journal, therefore manuscripts reporting results related to it will not be taken into consideration for publication in the *Journal of Cosmetic Science*.

SUBJECT MATTER

The JOURNAL will consider manuscripts for publication in the following categories, provided they are prepared in proper scientific style and adequately referenced:

1. **Original Articles:** Descriptions of original research work in cosmetics or related areas.
2. **General Articles:** Articles of a general character may be considered for publication providing they are of a scientific and technical nature. These articles may be concerned with newer analytical techniques, developments in dermatology, toxicology, etc.
3. **Review Articles:** Intended to present an overview of recent advances in a specific area related to cosmetics. The author of such a review is expected to be actively engaged in the area and capable of presenting a critical evaluation of published reports of a scientific and technical nature. Solicited by special invitation from the Editor and Editorial Committee; not subject to review by the Editorial Committee.
4. **Technical Notes:** Relatively short manuscript containing new information obtained by laboratory investigations; these do not contain the depth or extent of research involved in an Original Article.
5. **Letters to the Editor:** Comments on JOURNAL articles are invited, as well as brief contributions on any aspect of cosmetic or related science that does not warrant publication of a full-length paper in one of our other categories. May include figures and/or references, but brevity is necessary.

SUBMISSION OF MANUSCRIPTS

Manuscript Submission: Manuscripts submitted for publication should be accompanied by a covering letter and sent via email to the following address: scc@scconline.org. Please include the contact author's address, phone and fax numbers and email address.

Manuscripts received by the Editor will be acknowledged and sent to two reviewers. Normally, the Editor will advise the author of acceptance, rejection, or need for revision of the manuscript within 10 weeks. Important: Manuscripts and the data therein must not have been published previously. Upon acceptance, the manuscript becomes property of the SOCIETY OF COSMETIC CHEMISTS and may not be produced in part or as whole without written permission of the Society.

PREPARATION OF MANUSCRIPTS

Stylebooks for the JOURNAL OF COSMETIC CHEMISTS are the American Medical Association's *AMA Manual of Style* and the University of Chicago Press's *A Manual of Style*. Authors whose papers include figures should follow the section below on figure preparation.

The responsibility for good grammar and correct sentence structure rests with the author.

Organization should be thoughtful and not necessarily chronological. Unfamiliar or rare terms should be explained to make their meanings clear to all readers, especially those who are not well-versed in the language of the publication. Avoid all colloquialisms, jargon, and unusual abbreviations, and be as clear and brief as possible in the manuscript.

If you are not a native English speaker, we strongly recommend that you have your manuscript professionally edited before submission. Professional editing will mean that reviewers are better able to read and assess your manuscript.

Major revision or retyping of manuscripts cannot be undertaken by the Editor; these must be done by the author or his designated colleague. The suggestions that follow are intended to reduce the number of revisions and exchanges of correspondence needed prior to the publication of an article. Authors who follow these instructions closely will see their articles reviewed and published in the shortest possible time.

1. General Format: Manuscripts must be submitted electronically in Microsoft Office Word. Figures should be supplied digitally as either a Word file, pdf, TIFF, jpeg, or similar format. The title page of the manuscript should include the same name, address (including zip code) and affiliation of each author, as well as the title and date of the meeting where it was presented, if any. Please designate the corresponding author and provide a current email address for all correspondence.

2. Synopsis: Each article should be preceded by a brief but informative synopsis of 100 to 200 words. The synopsis should state the objective of the research, the experimental approach used, the principal findings, and the major conclusions. Follow the form used by Chemical Abstracts in preparing the synopsis.

3. Units of Measure: The SI (*System International*) metric units are preferred, following the trend in the scientific community. Where English or cgs units must be used, they should be converted to SI and placed following in parentheses. Abbreviations such as *m/s*, *ml*, *rpm*, and *ug* are used without periods. It is requested that authors avoid all unusual notations, e.g., milligram per cent (*mg %*) or *ppm* are better expressed as *mg/100g* or *mg/kg*.

4. Abbreviations: Any abbreviation that will not be immediately understood by a non-expert reader should be defined in parentheses following its first appearance in the text. In most cases, both clipped words and acronyms are unpunctuated. Chemical names and formulae should be unambiguously clear to the editor. Some prefixes before names of organic compounds must be italicized, e.g., *cis-*, *p-*, *tert-*, etc. Consult the list of commonly used abbreviations in the *ACS Handbook*.

5. Trade Names: A trade name must be followed by the sign "®," All common cosmetic ingredients should be referred to by their GENERIC names, as indicated in the latest edition of *International Cosmetic Ingredient Dictionary and Handbook (PCPC's)*, the *United States Pharmacopeia* (U.S.P.), and the National Formulary (N.F.). Manufacturer's designation may be included in parentheses. If a material is not listed, then the proprietary or trademarked name can be used, with the chemical composition and name and address of the manufacturer given in parentheses or footnote.

6. Structural Formulae: Structural formulae should be used only if absolutely necessary and if the chemical in question is not known to the reader. They should be numbered and referred to in the text by Arabic numerals.

7. Tables: Tables should be numbered consecutively, using Roman numerals. Appropriate captions should also be included.

8. Figures: To publish the figures in your article with the highest quality, it is important to submit digital art that conforms to the appropriate resolution, size, color mode, and file format. Doing so will help to avoid delays in publication and maximize the quality of images.

Color photographs, where they are essential to the content of the paper, may be acceptable at the Editor's discretion, and at an extra cost to the author. Authors are responsible for the cost incurred for the printing of color photographs, figures. If authors do not want to pay the cost for color, figures will be printed in shades of gray.

Sizing and preparation: Submit figures at their final publication size; do not scale figures.

All panels of a multipart figure should be provided in the same file. If symbols are not explained on the face of the figure, only standard print characters may be used. Include figure titles in the legend and not on the figure itself.

Labeling and Font Usage: Please use the same font for all figures in your manuscript, and use a standard font such as Arial, Helvetica, Times, Symbol, Mathematical Pi, and European Pi. Do not use varying letter type sizes within a single figure; use the same size or similar sizes throughout. The preferred font size is 8 points; the minimum font size is 6 points.

Resolution and Raster Images: Low-resolution images are one of the leading causes of art resubmission and schedule delays. Submitted raster (i.e. pixel-based) images must meet the minimum resolution requirements:

Monochrome (1-bit) images (line-art): Common examples are graphs and charts made of solid black and white, with no gray values. The suggested minimum resolution for this type of image is 1000 ppi at publication size.

Combination Halftones: Common examples are color or grayscale figures containing halftone and line art elements. The suggested minimum resolution for this type of image is 600 ppi at publication size.

Halftones: Common examples are color or grayscale figures containing pictures only, with no text or thin lines. The suggested minimum resolution for this type of image is 300 ppi at publication size.

Raster images should be supplied in TIF format. PDF and JPG are also acceptable.

Vector Images: Vector images are typically generated using drawing or illustration programs (e.g., Adobe Illustrator) and are composed of mathematically defined geometric shapes—lines, objects, and fills. Vector graphics are resolution independent and can be enlarged to any size without quality loss.

Vector images should be supplied in EPS format, with all fonts embedded or converted to outlines, and graph lines at least 0.25 points thick. PDF is also acceptable.

Authors who do not comply with these guidelines will be asked to resubmit their figures in a print-quality format, which may delay publication.

9. References: References should be numbered in the order in which they appear in the text and should be listed in numerical order at the end of the article under “References”. Citations in the text should be on line and parenthesized, e.g., (6) or (11-13). The references to journal articles must appear in the following form:

- (a) The initials and surname of each author.
- (b) The full title of the paper (first word capitalized).
- (c) The name of the journal in italics. Use standard abbreviations as in *Chemical Abstracts*.
- (d) The volume number in bold face type.
- (e) The first and last pages of the article separated by a hyphen.
- (f) Year of publication of the article (in parentheses); the month must be included for journals that do not use continuous pagination.

The following is an example of a correctly prepared journal reference; note all spacing and punctuation:

- 1) L. E. Gaul and G. B. Underwood, Relation of dew point and barometric pressure to chapping of normal skin,). *J. Invest Dermatol*, 19, 9-19 (1952).

Book references are handled similarly and should include pertinent page numbers:

- 1) S. Rothman, *Physiology and Biochemistry of the Skin* (The University of Chicago Press, Chicago, 1954), pp. 494-560.

References to books containing contributions from authors appear as follows:

- 1) S. D. Gershon, M. A. Goldberg, and M. M. Rieger, “Permanent Waving,” in *Cosmetics, Science and Technology*, 2nd ed., M. S. Balsam and E. Sagarin. Eds. (Wiley Interscience, New York, 1972), Vol. 2, pp. 167-250.

AFTER SUBMISSIONS OF MANUSCRIPTS

Rejection of Papers Submitted: Manuscripts not prepared in accordance with these directions or deemed to be outside the scope of articles published in the Journal will be returned to the author by the Editor.

After the manuscript has been reviewed by the editor and reviewers, the senior author will be sent any comments that need to be addressed. If necessary, the senior author must submit a revised manuscript which will be reviewed by the Editor prior to being approved for publication. If the revised manuscript is still not acceptable, the Editor may reject for publication.

Page Proofs: After an author’s paper is accepted and before final publication, page proofs will be emailed to the senior author for careful review and correction. Proofs should be verified against the manuscript and any alterations annotated in the PDF. The Publication Committee does not accept this responsibility. Alterations in an article after it has been typeset will be made at the author’s expense, and the author will be billed for such changes. Corrected page proofs must be returned within 10 days to the *Journal* office.

Offprints and Reprints: The senior author of each paper will automatically receive 10 offprints free of charge, following publication of his paper. Additional offprints, or the more expensive stitched reprints, must be ordered at the time the page proofs are returned and will be billed to the author. An order blank for this purpose will be sent to the author separately, please return it to the address specified.

Charges: There are no page charges. The author will be responsible for the cost incurred for the printing of color photographs, figures, etc. Any material set into type but ordered deleted from publication at the page proof stage must also be paid for by the author. These charges will be invoiced to the senior author at the time of publication. The senior author will be notified by email verifying the cost of printing in color. On acceptance, the senior author will be invoiced for color charges.

The California Chapter of SCC is a nonprofit membership organization with a focus on furthering the interests and recognition of cosmetic scientists while maintaining the confidence of the public in the cosmetic and toiletries industry. By joining the Society, members can take advantage of many opportunities to learn, educate, and network with their peers. There are different levels of membership (see below for descriptions). We encourage you to find the one that is right for you.

BENEFITS OF BECOMING A MEMBER

- Discounted rates to all California and National SCC functions
- California Chapter newsletter (Cosmegram) mailed and emailed, published 8 times per year
- Subscription to the Journal of Cosmetic Science, the National Society publication, published 6 times per year
- Updates on the newest technology
- Scientific Seminars
- Suppliers Day
- Networking
- Member discounts to IFSCC Conferences and Congresses

TYPES OF MEMBERSHIPS

General Membership - General Membership is available to persons engaged in scientific or technical work in the cosmetics and toiletries industry or in related governmental or academic areas, who have earned a Bachelor's Degree in the chemical, physical, medical, pharmaceutical, biological or related sciences and technology. In addition, those working in a technical capacity within the industry for at least five years, who have completed two years in a recognized related academic program are eligible, as those who may lack sufficient academic background, but who have worked in a technical capacity in the cosmetic science industry for at least ten years.

National Affiliation - Available to persons interested in the objectives of the Society, but not qualified for General Membership. National Affiliates are entitled to all membership privileges, except that they may not vote or hold elected office within the Society or its Chapters.

Junior Membership - Available to persons who hold an appropriate undergraduate degree in science and who are pursuing a post graduate degree. Junior Members are entitled to all membership privileges, except that they may not vote or hold elected office within the Society or its Chapters. Half dues.

Student Membership - Available to fully matriculated undergraduate students in a scientific program at recognized colleges and universities. Student members are entitled to all membership privileges, except that they may not vote or hold elected office within the Society or its Chapters. Reduced dues.

Emeritus Membership - Any member who has reached the age of 65 years and who has been a dues paying member in good standing for 25 consecutive years may request to be nominated for transfer to Emeritus Membership status. Upon approval by the Board of Directors, such members shall be entitled to all privileges of a General Member for life, with exemption from payment of dues, except that they are not eligible for election as an Officer or Director within the Society.

Retired Membership - Any member who has retired from the cosmetic industry and is over 55 years of age, and has been a dues paying member in good standing for 15 years, may apply for Retired Membership status. Upon acceptance, Retired members are entitled to all privileges of a General Member, except that they may not hold elected office within the Society or its Chapters. Half dues.

Fellow Membership - General members who have achieved full maturity in the profession, as evidenced by a record of outstanding achievement and leadership may be elected a Fellow of the Society by the Board of Directors upon recommendation by the Fellow Certification Committee.

Honorary Membership - Granted by the Board of Directors to individuals for distinguished service to the Industry.

HOW TO BECOME AN SCC MEMBER?

Apply Online at www.sconline.org

- Or -

Download [Membership Application](#) and complete and submit to the National SCC office (address and fax on the application). Please contact [Tina Marie Lesko](#), Membership Chair, if you would like more information about becoming an SCC member.
